REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Kanekiyo et al (US 2004/0051614 and 2004/0020569) is cited as of interest.

Kanekiyo et al teaches boride compound as grain boundaries between magnetic crystals, however does not fairly suggest the presence of the boride compound as grain boundaries between magnetic crystals in a second undercoating layer of a perpendicular magnetic recording media, as in all of the claims; and applicant's have demonstrated unexpected results in improving Reproduction Signal Output as the claimed boron grain boundaries are used for crystal alignment in the second undercoating layer of a perpendicular magnetic recording media as shown by Rocking Curve in instant Tables 1, 3, 6 and 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
